

Water Discovery Box

Make a Water Filter

Materials:

- 3 liter bottle
- 2 Inches Coarse Gravel
- 2 Inches Fine Gravel
- 1 Inch Coarse Sand
- .5 Inch Activated Charcoal
- 1 Inch Fine Sand
- Cotton

Directions:

Carefully cut the end of the three liter bottle off evenly. Place the cotton in the pour spout at the bottom then layer the sand, charcoal, and gravel from the bottom to the top. Use another container to pour water into the water filter. Place a glass or container below to collect your filtered water.
