

Water Discovery Box

Hydrologic Cycle

Using the picture, place the six steps of the hydrologic cycle into the correct order.

- _____ Recharges water in rivers, streams, lakes and ponds.
- _____ Surface water is evaporated again.
- _____ Falls to the Earth in the form of precipitation.
- _____ Water evaporates from surface water and plants and enters the atmosphere as water vapor.
- _____ Evaporated water vapor condenses in the atmosphere.
- _____ Run-off water seeps into ground water and aquifers.
